

# Setting the Stage

What are our  
priorities?

# National Stunting Rates In A Global View

# Subnational Stunting Rates

# Undernutrition: What We Know Relatively Well

Malnutrition has both short- and long-term adverse effects

## Health

- higher rates of illness
- increased disability
- premature death

## Education

- lower attainment
- lower achievement

## Economy

- Reduced employment opportunities
- lower lifetime labor earnings

# Undernutrition: What We Know Relatively Well

- Environmental factors explain much of the variation in nutritional status between populations, not genes
- Intergenerational transmission means deficits remain even if environmental factors today are much improved

# Undernutrition: What We Know Relatively Well

- What nutrition-specific interventions are needed and when during the lives of women and children

• Supplementation  
And Fortification

• Exclusive  
Breastfeeding  
(6 mos)

• Complementary  
Feeding

• Diversified Diet

• Emergency  
Nutrition

# What We've Learned In SAFANSI

- Animal waste management
- Safe drinking water
- Children as change agents
- Burden of NCDs
- Multi-sector action requires many skills
- Understand system and market failures
- Behavior change research and support

# GROUP WORK

# Group Exercise – 20 minutes

- What are the top 3 priorities you are working on right now?
- Where Are You Achieving Good Nutritional Outcomes in a Non-health Sector?

# The Most Important Reason To Attend The Roundtable

- Understand the fine details of how to implement a nutrition sensitive policy
- Learn about the latest evidence on nutrition costs and benefits
- Meet similar colleagues from different countries
- Exploring harmonization of nutrition work in the region

# What Are The Main Challenges In Supporting Good Nutritional Outcomes Through Your Work?

- 1. Multi-sectoral collaboration
- 2. Governance
- 3. Harnessing nutrition data

# Where Are You Achieving Good Nutritional Outcomes in a Non-health Sector?

- WASH activities, inclusive of education
- Multi-year approaches to nutrition intervention
- Food security and nutrition sensitive agriculture
- Safety nets
- Nutrition-sensitive agriculture
- Approaching nutrition issues from a food systems and diet angle

**THANK YOU!** |
